The Touro College and University System is a Jewish-sponsored independent institution of higher and professional education serving the larger American community. Approximately 18,000 students are currently enrolled in its various schools and divisions. Touro College is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, phone number (267) 284-5000. The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the United States Secretary of Education and the Council for Higher Education Accreditation.

All Touro branches in California and Nevada are accredited by the Accrediting Commission, for Senior Colleges and Universities of the Western Association of Schools and Colleges, 985 Atlantic Avenue, #100 Alameda, CA 94501, phone number (510) 748-9001.

For more information on the Touro College & University System, please visit us on the web at: www.touro.edu or call (212) 463-0400.

Message from the President

At Touro, we recognize that the education we provide can only be as refined as the scholarship of our instructors. We know that our investment in faculty research is what sets us apart as a premier institution of higher learning and a national and global leader in academic research.

This compilation, which is the ninth annual compendium of faculty publications, represents Touro's commitment to being a leader on multiple research frontiers. As in the past five years, this volume features the work of the faculty at Touro College & University System as well as at New York Medical College. It contains over 585 authors and represents the immense quality of scholarship arising out of our institution. For a seamless reading and reference experience, this book contains an alphabetical index and organizes entries by school. The Touro College & University System 2017 Faculty Publications Book is an extension of the Touro Faculty Publications Database, which contains over 7,300 searchable entries. As the fifth volume to combine the investigative output of Touro College and New York Medical College, it highlights our institution's commitment to interdisciplinary work and exhibits the strong research synergies our partnership has created. As in past volumes, I invite you to search this book as well as Touro Scholar, our institutional repository which has replaced the Faculty Publications Database (<http://touro.edu/library>), to discover fascinating research in a multitude of disciplines.

Our faculty's continued commitment to scholarship reinforces our mission of achieving excellence in higher education, and our dedicated library staff and administration will continue to support all efforts to deepen that scholarship and increase collaborative research opportunities across our institution.

Sincerely,

A handwritten signature in dark ink, appearing to read "Alan Kadish". The signature is fluid and cursive.

Dr. Alan Kadish
President

Message from the Provost for the Graduate and Professional Divisions

Dear Members of the Touro College & University System Community, Congratulations to the Touro College & University System (TCUS) community of scholars whose work is contained in this volume. It is a demonstration of the thought leadership and intellectual inquiry that advances knowledge and that TCUS strives to support and foster. The works referenced herein represent a wide spectrum of disciplines and interests, important collaborations, and in some cases, years of investigation. Some of the work is a result of funded research and all of the effort is the result of passion on the part of the faculty scholars who share their expertise and perspectives for the greater good.

Today, more than ever, the work of our faculty is high impact since the days of searching manually for previous work located only in hard copy in a library in another state or even country has ended. The discovery and ideas contained in the books and articles written by our faculty and detailed in this publication is now available digitally - thanks in large part to the Touro Library staff – worldwide, connecting a vibrant international community of scholars and increasing multifold the importance of faculty scholarship. This has been accomplished by the implementation of our institutional repository, Touro Scholar. This online scholarly archive has been around for two years, and has already amassed 3,108 publications. People in 167 countries have downloaded these publications 27,342 times. Truly, this shows the world what the Touro community has to offer.

Thank you to the leadership and staff of the Touro Library who supports the faculty and enables the robust quality of research that takes place in our Institution. Thank you also to the faculty who collaborate and ignite the ability of colleagues and students to continue the discovery research that advances knowledge and makes a difference for humanity.

A handwritten signature in dark ink, appearing to read 'Patricia E. Salkin'.

Patricia E. Salkin
Provost for the Graduate and Professional Divisions
Touro College

Message from the Provost for Biomedical Research

As scholars our ultimate goal is to disseminate the new knowledge that we generate—in the classroom, throughout our disciplines, and to the public.

A cornerstone of our profession, therefore, is our scholarly productivity, most notably that of publications—from books to articles to reviews. The track record of scholarly publication not only is central to our individual achievement and reputation, it also reflects importantly on the prominence of the Touro College and University System and the individual campuses and schools in which we hold our appointments.

Moreover, our publication success is a fundamental factor in the evaluation of applications for external support, knowledge of which I can draw upon from my experiences both as a grant applicant and as a peer reviewer of proposals.

After two years as Provost for Biomedical Research and Chief Biomedical Research Officer for the Touro College and University System, I find myself increasingly impressed by the wealth and breadth of scholarly activity among our faculty throughout our campuses. Just as critical, I am delighted by the enthusiasm with which our faculty has run with Dr. Kadish's challenge to expand our research footprint! To provide you with just one example, we had a record 136 posters that were presented at Touro College Research Day 2019, capturing results pursued by faculty, students, and staff during the past year here in New York.

In the biomedical and health sciences we continue to build momentum through our Seed Funding Grant Program and establishing intellectual connections across the System. A noteworthy example of the latter is a new initiative by which we have identified key faculty members conducting research in metabolism, obesity, and diabetes (MODI). We plan to invest in those core groups so that from that platform we can aggressively pursue support, from government, foundations, and industry.

Particularly gratifying is the approval by the New York State Board of Regents of the first Ph.D. doctoral program at Touro College—in Jewish Studies. This milestone sets forth an opportunity for expansive scholarship in the humanities, too.

This is truly an exciting time for us. I thank you for your engagement and

support as we pursue research on multiple fronts. To my colleagues, whose citations in this volume are a testimony to where we are and what we can yet accomplish, congratulations on your achievement!

Sincerely,

A handwritten signature in black ink, appearing to read 'Salomon Amar', with a large, sweeping initial 'S' and a series of loops and strokes for the rest of the name.

Salomon Amar, DDS, Ph.D.

Provost for Biomedical Research/Chief Biomedical Research Officer

Touro College and University System

Professor of Pharmacology

rofessor of Microbiology and Immunology

Acknowledgments

When the Faculty Publications Database ceased updating in August 2017, it had over seven thousand citations in it. We have succeeded in transferring all 2017 citations over to Touro Scholar, and have also managed to add hundreds of other citations and full text since then.

These projects showcasing faculty and student research would have been impossible to accomplish without the assistance of many people in the Touro College and University System/New York Medical College community:

- President Dr. Kadish, Executive Vice President Rabbi Krupka, Provost Salkin, and Provost Amar for continually supporting the library and this project;
- Esther Greenfield for her excellent attention to detail and editing talents, as well as ensuring that every year the book is polished and professional;
- Sara Tabaei, for her constant encouragement and expert advice and supervision;
- Bashe Simon (Director of Touro College Libraries), June Simms (Former Library Director at Touro University Nevada), and Tamara Trujillo (Library Director at Touro University California) for readily helping us to identify faculty at their campuses and validate their bibliographic information;
- Marie Ascher (Director), Nina Kurzban (Cataloger), Jovy O'Grady (NYMC Scholarly Communications Librarian) and the rest of the New York Medical College Health Sciences Library staff for their dedication in incorporating their 2017 publications into the Faculty Publications book and Touro Scholar;
- Liping Ren and Yan Chen for their expedient technical support;
- Marina Zilberman and Valerie Shrager, for their ready assistance with translations;
- The Research Council Committee for their incredibly useful feedback and support.

We are pleased to report that Touro Scholar continues to grow. We're extremely excited about the global reach we've had in sharing both faculty and student work, including three student journals, and hope you will continue to help Touro Scholar develop.

Carrie Levinson
Scholarly Communications Librarian

Note from the Library

This year's Faculty Publications Book is a reflection of the 2017 academic, literary, and scholarly publications of Touro College & University System faculty. The diversity of the entries attests to the continuing research and literary efforts on the part of faculty.

This book is again organized in two ways, by listing faculty members alphabetically, and by listing publications by the different schools in the Touro College and University System. This system affords greater usability.

At present this publication is an offshoot of Touro Scholar, our online repository, which is designed to showcase the scholarship coming out of the Touro College & University System. It features the ability to download articles, data, and other materials, and it offers usage statistics for all hosted work. All content is fully discoverable with search engines such as Google. Carrie Levinson, the Scholarly Communications Librarian, maintains Touro Scholar on a constant basis and deserves our appreciation for her dedicated efforts. Sara Tabaei, Library Information Literacy Director, oversees the entire production of this publication.

I thank Marie Ascher, NYMC Library Director, and her staff for their assistance in compiling this work.

We value the support that the library receives from the President's Office and appreciate the encouragement of Dr. Kadish, President of the Touro College and University System.

We are saddened to note the passing of Dr. Robert Stern, professor at the Touro College of Osteopathic Medicine in Harlem. Dr. Stern has several publications in this year's book and was a prolific author.

We congratulate the authors who are represented in these pages and encourage all faculty and staff members to share their research and literary accomplishments with the library thereby making the research available worldwide for scholarly research.

Bashe Simon
Director of Libraries

Note from the NYMC Library

Congratulations to all 2017 Touro and New York Medical College authors for your hard work in seeing your research through to publication, and many thanks to the staff of the libraries of NYMC and the Touro College and University System who collaborate to organize this publication and the Touro Scholar institutional repository. I'd like to specifically thank Nina Kurzbach, who puts her heart and soul into collecting the information about NYMC publications you see here, and Jovy O'Grady, Scholarly Communications Librarian, who has spearheaded the Touro Scholar effort at NYMC.

This year, for the first time, all publication citations and abstracts were entered into the Touro Scholar repository. From this point forward, this repository will be the place to find all NYMC citations, and it is our hope that researchers will embrace the Open Access movement and regularly deposit their full text manuscripts into Touro Scholar as well. Doing so will increase the availability of your work as open access, which will mean for you: more readership, more citations, and more value.

Many thanks to Carrie Levinson at Touro Library for her work on the print bibliography and for offering leadership on the Touro Scholar initiative. We've come a long way from a print-only bibliography at NYMC where the first was published in 1993.

As a library, we are committed to supporting research at every step of the process and promoting the work of our faculty researchers. Through this publication and through Touro Scholar we achieve this goal.

Marie T. Ascher, MS, AHIP

List of Publication Criteria

Included

- Abstracts published in scholarly/academic journals
- Conference/symposium articles in published proceedings
- Articles in scholarly/academic/professional journals
- Bibliographies
- Books (authored/edited)
- Book chapters (authored/edited)
- Book/film reviews in academic publications
- Creative works – curated or published; not self-published (poetry, novels, short stories, published plays, art exhibits, musical scores and choreographed dance, audiovisuals)
- Encyclopedia entries (excluding Wikipedia)
- Evidence-based publications in peer-reviewed journals
- Letters to the editor, if published in peer-reviewed journals
- Monographs
- Patents
- Published dissertations (beyond ProQuest Dissertations and Theses)
- Technological/software products (e.g. apps, if published through iTunes or Google Play; not self-published)
- Test reviews in Mental Measurement Yearbooks
- Textbooks
- Translations of literary or scholarly work(s) from and into English, if translations are by the TCUS faculty member

Excluded

- Announcements of presentations that are printed in conference/events program (including abstracts)
- Blogs
- Broadcast media
- CATs or CAPs (Critical Appraisal Topics or Papers)
- Committee reports
- In-house or departmental newspaper articles
- Interviews
- Job titles and responsibilities
- Opinion pieces
- Newspaper articles
- Newsletter items
- Obituaries/eulogies
- Pending patent applications
- Popular magazine articles
- Presentations, including poster presentations
- Unpublished technical reports & working papers
- Vanity presses
- Items that have the following description: “in press”, “forthcoming”, “advance access online”, “epubs”, “pre-pub online”, “corrected proofs” or any other kind of publications that do not have their bibliographic information available

Every effort was made to identify and include all Touro College and University System faculty authors who published between January 1, 2017 and December 31, 2017. We regret any omissions or inadvertent errors.

We invite faculty authors to submit their 2018 publications information to Carrie Levinson, Scholarly Communications Librarian, via email at carrie.levinson2@touro.edu or by phone at 212-463-0400 ext. 55397, for inclusion of their publication(s) on Touro Scholar.
